

7.3.1 report on the performance of the institute

Objective

- To provide professional qualification to the tribal students of Palghar district.
- To place the tribal students in good position in the industries in MIDC and GIDC.

Content

From the establishment SASIMS realise that the students of Palghar district are not keen to study. As well as they also don't know how to go for good industrial jobs. Their situation was not improving after getting graduate also. As the courses they were opting was traditional courses like BA, B.com, B.Sc. as so on. Even if they go for post-graduation their position was not getting improvised. As they get recruited for very small designation in the organisation. Due to which their salary is also very low.

So, SASIMS decided to provide professional qualification to such students. With the motive in mind SASIMS started taking workshops in nearby graduation colleges. To enlighten them about the importance of MMS course. These workshops are organised on a regular basis in the colleges. The representatives solve their queries, drought and dilemma regarding the course and the fee of the course. As they feel that the fee of these courses is out of their reach. The representatives share the government scholarship programs with the students and if needed to their parents too.

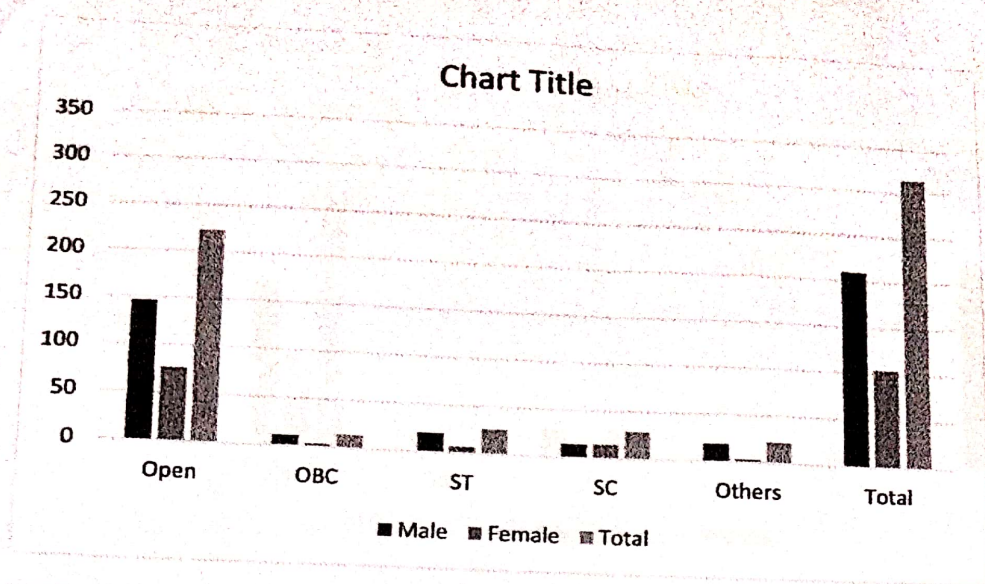

As MBA course is new for them. They don't have much information about this course. We give them information out the course detail. And in which type of industry, they can get the jobs in the industries and in which type of department.

Outcome

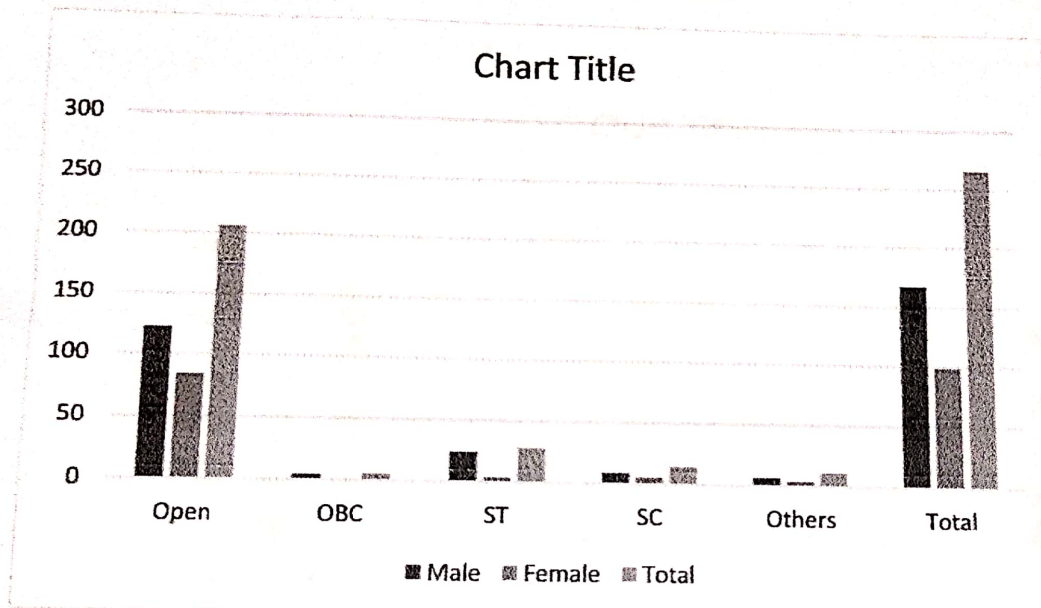

- Financial situation of the students is getting better and they are growing in their career.
- Seeing their growth their friends and siblings are also getting motivated to join the course in our institute.

The tables denote the demography of the students admitted to SASIMS.

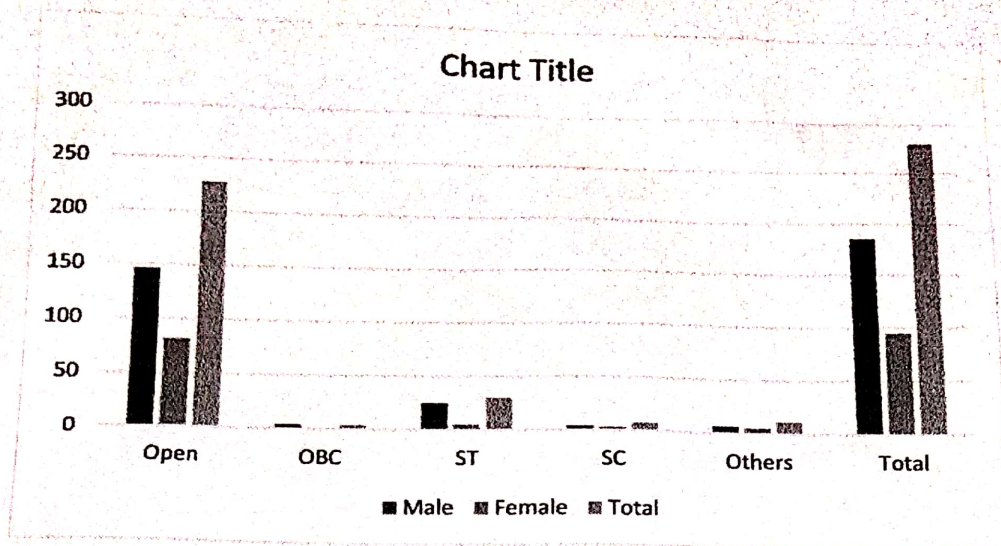

2017-2018

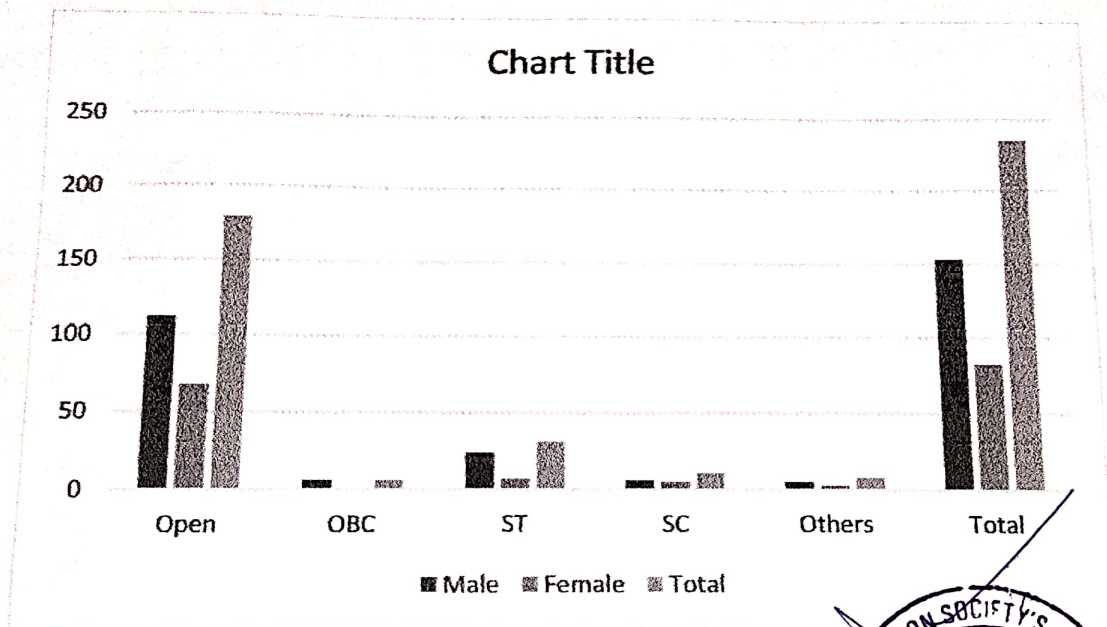

2018-2019

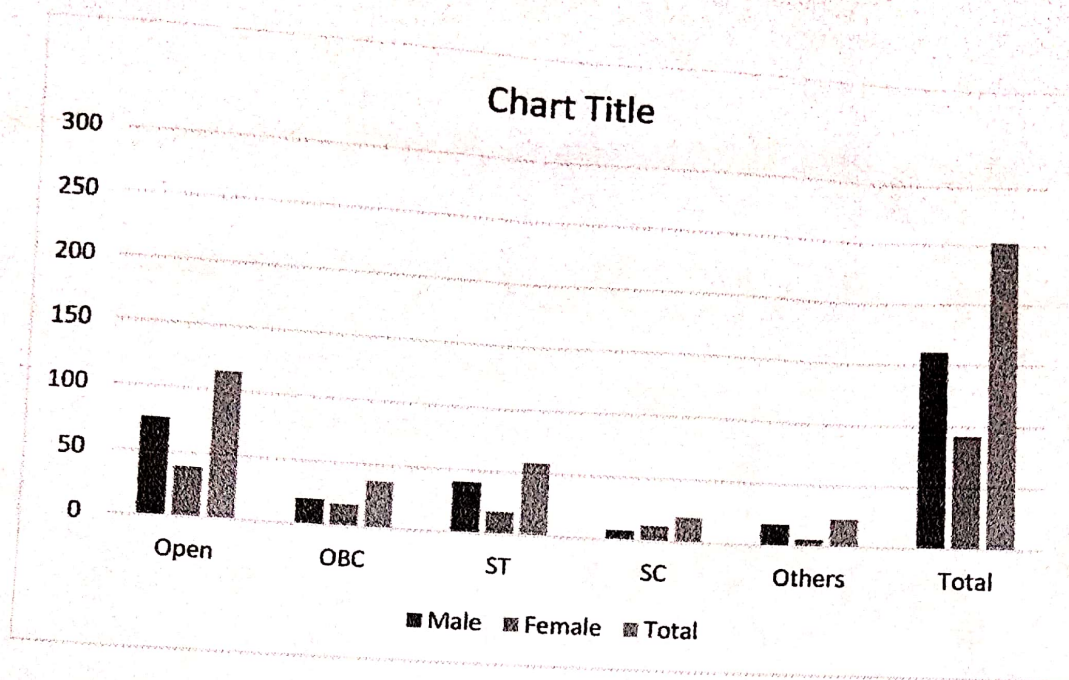

2019 -2020

2020 – 2021

2021 - 2022
